

Payment Script Monitor

Help merchants safeguard payment pages, secure scripts, and navigate complex requirements while generating revenue.

Digital skimming attacks target legitimate merchant check-out pages, injecting malicious code to steal consumer cardholder data.

To comply with PCI DSS requirements (6.4.3 and 11.6.1), merchants must actively monitor their payment pages for malicious activity.

Aperia's Payment Script Monitor addresses these compliance requirements by offering an automated solution that monitors scripts—alerting merchants of unauthorized modifications and ensuring ongoing compliance.

Attract more merchants and generate recurring revenue by adding value with premium compliance tools.

The Benefits of Aperia's Payment Script Monitor

Revenue Generation

Boost profitability with a cost-effective solution that enhances compliance and supports business growth.

Comprehensive Solution

Address both PCI DSS requirements (6.4.3 and 11.6.1) in a single, seamless platform.

Risk Reduction

Protect your merchants' payment pages from malicious activity with continuous monitoring and alert systems.

Ease of Use

Save time and resources with a simplified approach to PCI DSS compliance.

How the Payment Script Monitor Works

1 Simple Set Up

Intuitive validation portal prompts merchants to load payment pages into the system for easy onboarding.

2 Baseline Inventory

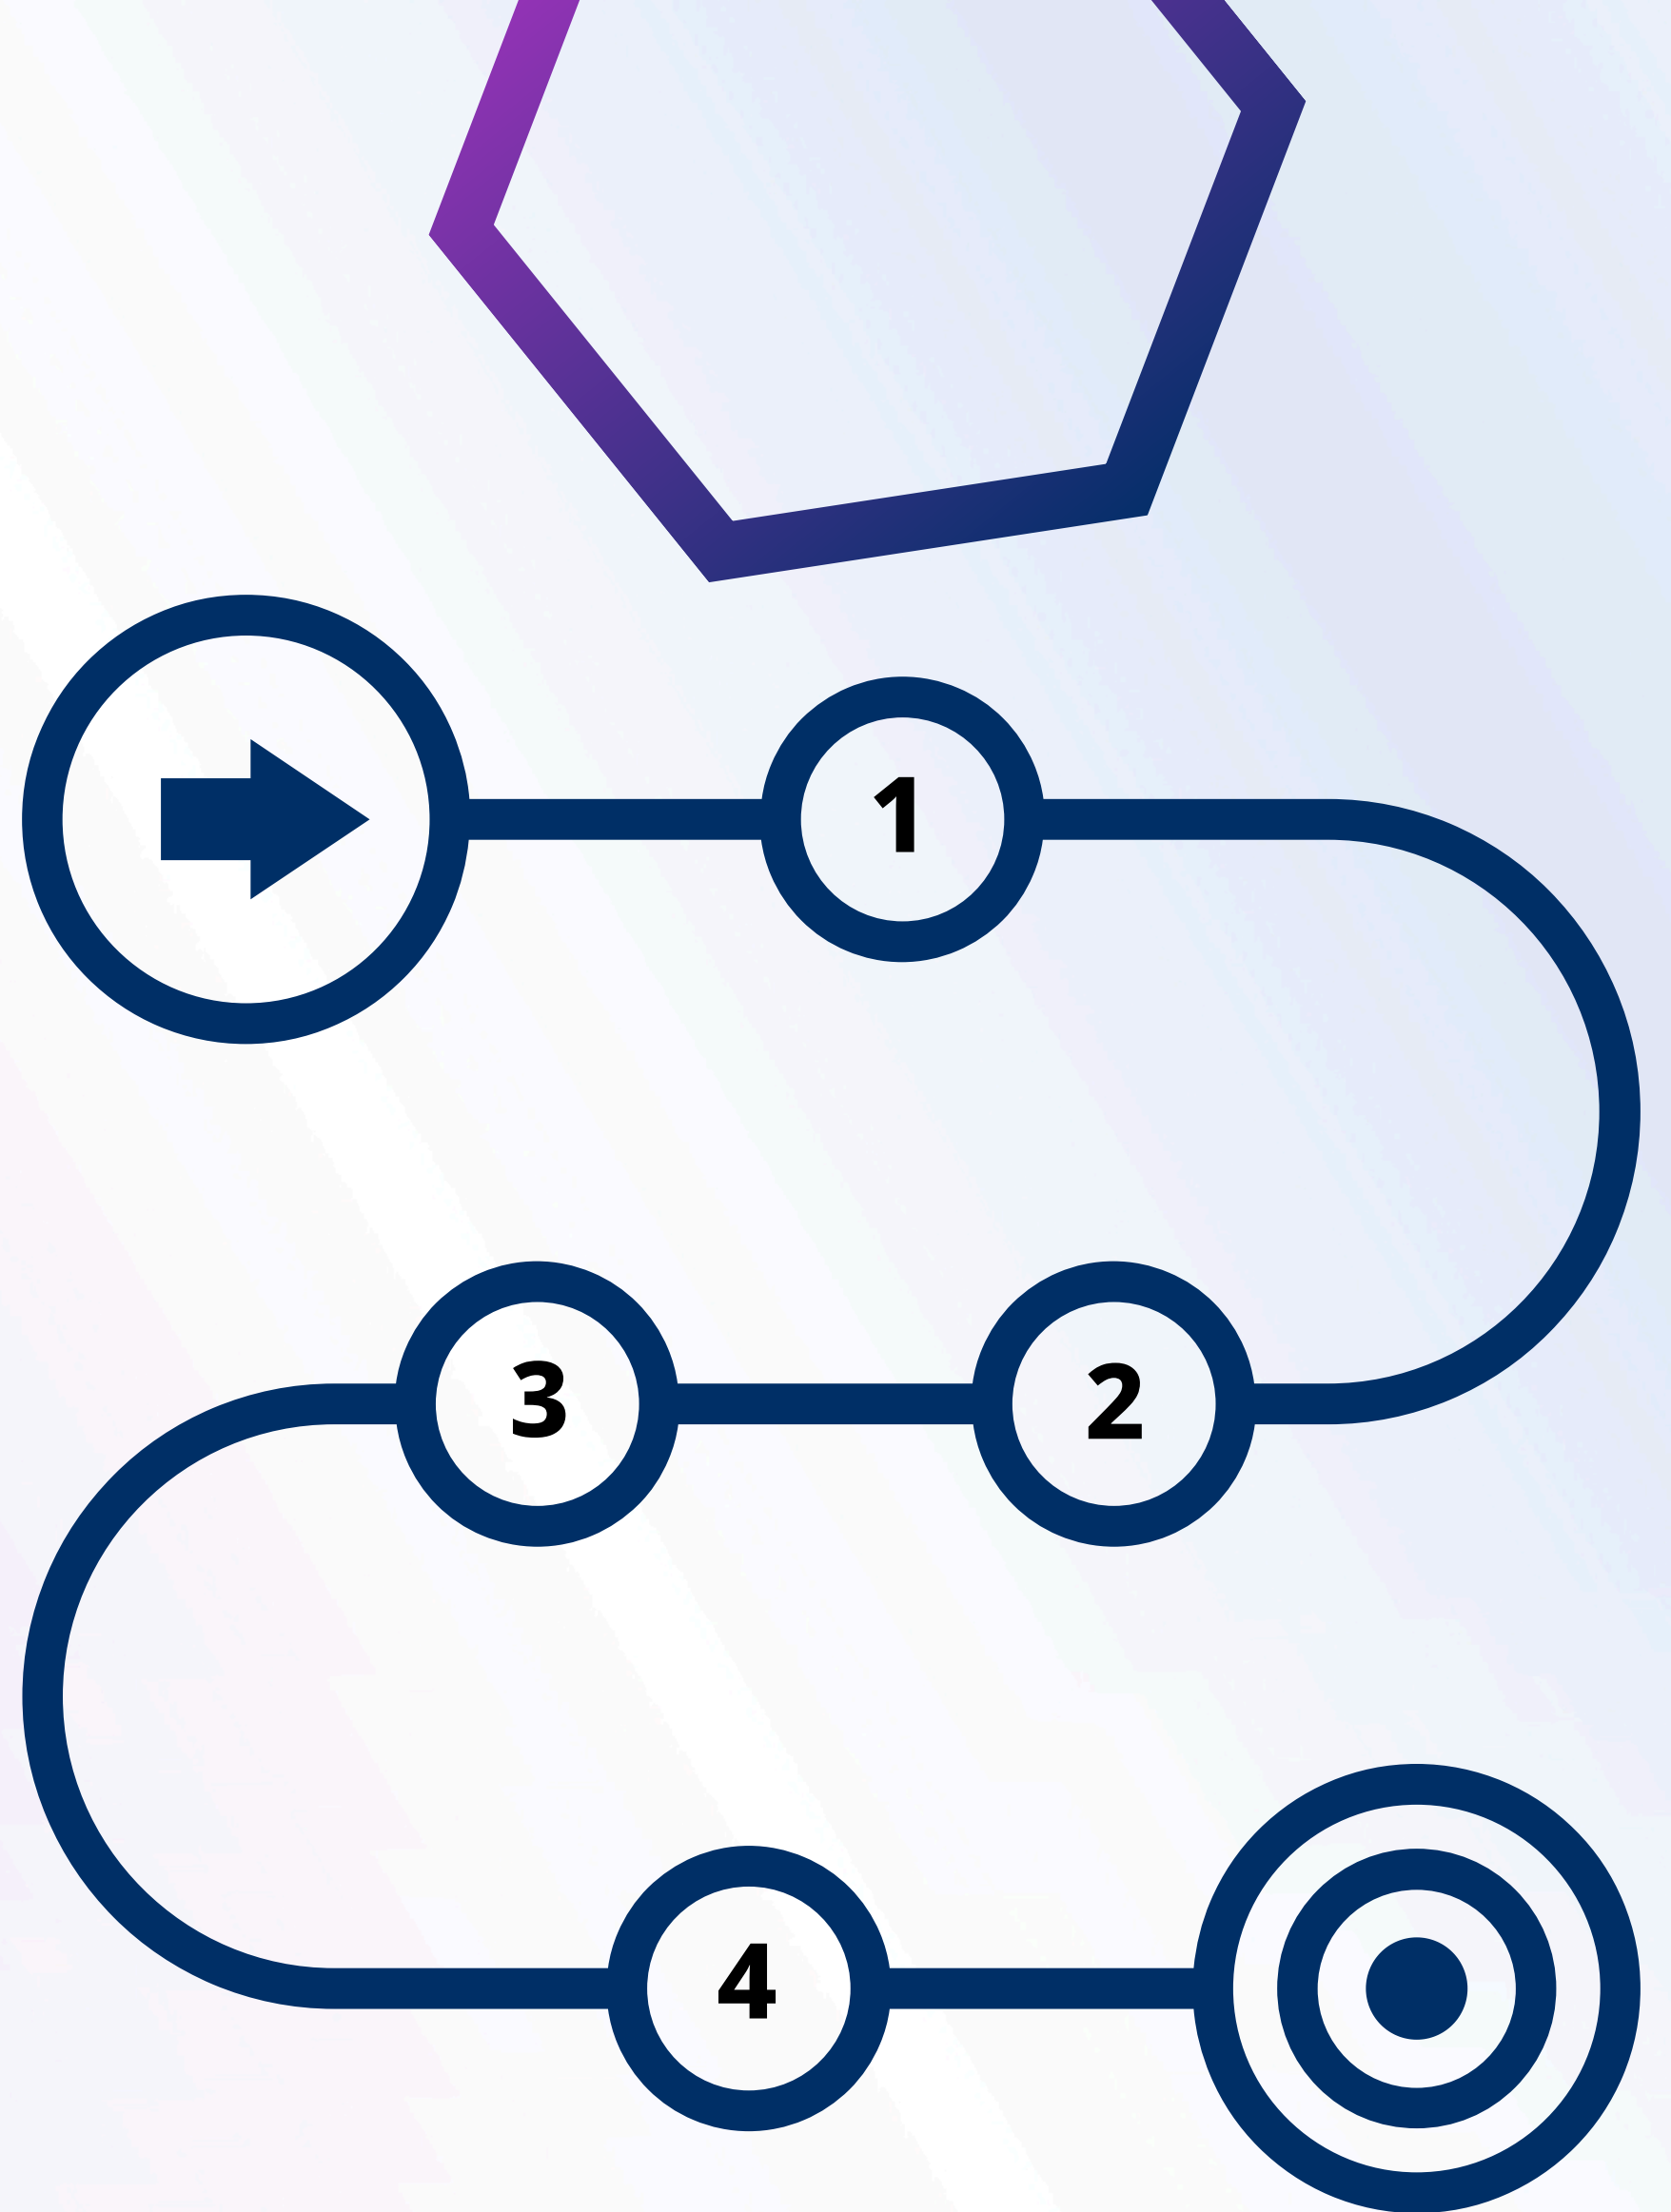

Automatic creation of a baseline inventory of scripts to streamline the process for merchants.

3 Script Authorization and Validation

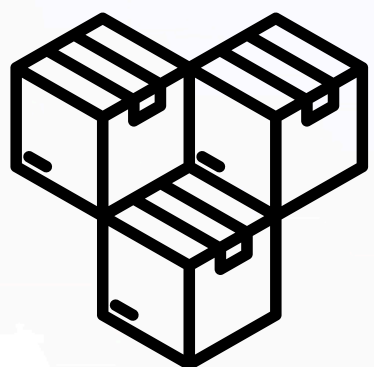

Guided script authorization and validation for smooth compliance.

4 Continuous Monitoring

Active monitoring of scripts to detect unauthorized changes and ensure compliance and US-based phone support.

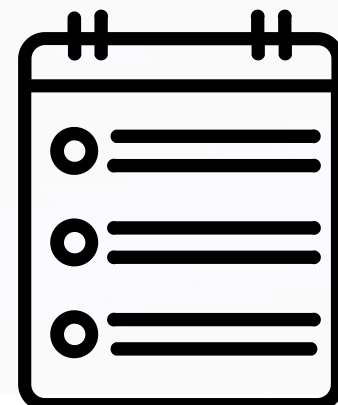

Payment Script Monitor Features

Automated Script Inventory

Instantly creates a detailed list of all scripts on payment pages for easier onboarding.

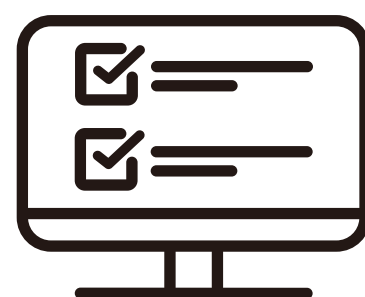

Script Validation Tools

Provides a step-by-step process for merchants to review and authorize payment scripts.

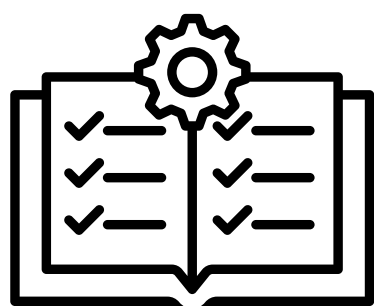

Real-Time Script Tracking

Continuously monitors scripts to detect and flag unauthorized changes.

Centralized Compliance Portal

A single interface for loading, managing, and validating payment page data.

Alignment with PCI DSS Requirements

6.4.3 and 11.6.1. Specifically designed to meet compliance mandates.

U.S. Phone Support

Get expert phone support from experienced payment industry professionals.

Aperia Compliance, an IXOPAY company, is a leader in Payment Card Industry (PCI) validation and risk management, providing PCI Level 3 and 4 compliance for ISOs, payment processors, and small and medium-sized businesses.
